

PRODUCTION

We are a long established professional video production company based in High Wycombe, Buckinghamshire, west of London and close to Heathrow Airport.

Whether it's filming your CEO's message, a promotional video for your company's products, a multi-camera shoot covering your latest event, or a customer case study; Take One can always assure you of a professional approach and an end result that will enhance your company profile on-line.

We pride ourselves on our attention to detail, our experience, our proactive approach, our friendly crews and always offer value for money, making your production budget go that little bit further. We work in close partnership with you as a part of your company team, understanding what you want and interpreting your brief to deliver on time and on budget.

We will take on the whole production process for you so you don't have too; or you can simply book us to provide you with a video crew and equipment and you take it from there.

We are friendly, approachable, enthusiastic and simply love what we do and with a creative flair that makes your video stand out from the crowd.
